EDUCATION

University of Maryland

Master of Science, Human-Computer Interaction

Bachelor of Science, Information Science

College Park, MD

Expected: May 2028

Dec 2024

Honors & Extracurriculars

- **Phi Kappa Phi Honor Society:** Inducted into the nation's oldest and most selective honor society, recognizing academic excellence among the top 10% of graduate students at the University of Maryland
- **VC University (NVCA & Berkeley Law):** Completed a 10-week program covering fund economics, term sheets, deal structuring, and cap table modeling, taught by partners at Andreessen Horowitz, Bessemer, and Forerunner
- **Startup Shell:** Admitted as a Founder to the Fall 2022 cohort (top ~10% of applicants) of UMD's student-run startup incubator, joining a community of founders building venture-stage companies.

PROFESSIONAL EXPERIENCE

USM Maryland Momentum Fund

Summer Investment Associate (returned from Fellowship)

Baltimore, MD

June 2026 — July 2026

- Screened 16 companies, running diligence and 5 expert panels across applied AI, B2B healthcare software, life science, and deep tech, gating each on IP ownership, unit economics, and defensibility before advancing.
- Co-authored an investment memo and 9-company landscape of the AI agent market within the healthcare space, presented to the Executive Committee and Advisory Board, where the deal advanced to a commitment.
- Designed a sourcing engine ingesting SEC Form D filings and federal SBIR awards to rank regional deal flow, surfacing companies weeks before their raises reached public channels.

Venture Fellow

Feb. 2026 — May 2026

- Led sourcing stage diligence on a deep tech materials startup, building a structured thesis across technology, market, business model, traction, team, and moat from primary founder materials and external research
- Surfaced the deal's highest conviction risks; pre revenue hockey stick projections, 100x manufacturing scale up, customer concentration exposure, and issued a pursue/track/pass recommendation grounded in them

Towers Surgical Partners

Data Analyst

Rockville, MD

Jan. 2025 — June 2025

- Engineered a Python ETL pipeline aggregating provider data across fragmented healthcare directories, reducing manual research workload 70% and accelerating provider network expansion analysis
- Built Tableau dashboards and geographic coverage models across major U.S. MSAs analyzing referral flow, revenue, and procedure trends, which leadership used to set provider recruitment priorities.

Data Analyst Intern (Summer/Fall/Winter)

May 2024 — Dec. 2024

- Built network tracking tools adopted by leadership, becoming the team's system for prioritizing outreach across a growing partner portfolio; scraped and verified physician data across the US into a national specialist directory
- Built a Python ETL pipeline and Tableau dashboard processing 5,000+ insurance documents, surfacing revenue cycle inefficiencies to support litigation billing review and accelerate case preparation

Frontground

Founder

College Park, MD

Sept. 2022 — May 2024

- Founded and led an early-stage health-tech startup from concept to go-to-market, securing \$25K in non-dilutive funding across competitive pitch processes, including the Pitch Dingman Competition (Social Impact Award, \$10K).
- Ran 60+ physician interviews across Liberian healthcare facilities to validate product-market fit and map adoption barriers, turning primary field research into the product roadmap.

PROJECTS

Ovara: A Fertility Access Intelligence Platform

Data Scientist

College Park, MD

Jan. 2026 — May 2026

- Built a 17 stage Python pipeline turning six federal datasets (CMS NPDES, Census, HRSA) into an access intelligence product that flagged 1,038 reproductive health "access desert" counties through regression and clustering

Kairo Health: OCR Noise in Clinical NLP

NLP Researcher

College Park, MD

Jan. 2026 — May 2026

- Designed a controlled study benchmarking a regex baseline against a zero-shot LLM across five OCR noise tiers, showing the LLM significantly outperforms under heavy noise and catching two under triage errors dangerous enough to define a clinical deployment safety guardrail.

SKILLS & ACTIVITIES

Skills: Jira, Trello, Tableau, PowerBI, Powerpoint, Excel (PivotTables, VBA), Figma, AdobeXD, Salesforce, PitchBook

Data/Scripting: Python (pandas, scikit-learn, numpy, PyTorch), Spark, R (tidyverse, dplyr, ggplot), SQL, Scala, Git, Neo4j
